

3 Sit @EOT

Unlock humanity with functional EOT lockers that users will love

Effective and functional EOT lockers factor into the decisions office workers make about sustainable transport. A distasteful end of trip experience can have a negative impact, not only on the employees well-being but also on the perception people make about the business in general.

That is why we have committed ourselves to creating @EOT lockers that reinforce the value people get from maintaining an active and healthy lifestyle.

3 Sit @EOT is a locker that provides more than just a storage area in an EOT space. It offers a comfortable seating space for users so they get the best usage experience out of these lockers.
