

# Steam Station

## Unlock humanity with a quick and efficient steaming solution

The Steam Station is a quick and efficient alternative to the traditional iron when we talk about removing creases and wrinkles out of clothing in an EoT space. Consider this as an elegant way to provide the end users a more practical steaming solution in a fast-paced working environment.

This Steam Station combines power and precision with its antibacterial properties and offers less obstruction within the surrounding area. It has a big ventilation slot at the back and a cavity space that creates extra ventilation to actively control impurities .

Go for this Steam Station if you want a neat, luxurious, and efficient steaming
