

Active Plant-ette

Unlock humanity with biophilic lockers that connect you more

Mental health disorders are said to be one of the largest contributors to disability worldwide. This is primarily because of our diminishing connection to nature, with longer hours spent in the office and away from the natural world.

Active Plant-ette is the locker that will help you reshape how people interact within built environments we call “workspaces.” With its biophilic features that include a planter box running over the top of an Active Banquette, this locker effectively mirrors exposure to the natural world, therefore improving overall wellness, increasing creativity and productivity, and reducing mental stress.
